### **Author's Introduction**

Imagine... Discovering a happiness in your life that is unshakable and everlasting... The experience of love so pure and sacred, it could only be divine... Sex that is so incredible, it takes you beyond the realm of your physical body to a state of pure bliss... Imagine... A new age approach to love and self-exploration in the new millennium. Welcome to the fascinating and exciting world of Mystical Seduction!

The Mystical Seductress is a special woman, intrinsically connected to nature and the earth, deeply spiritual and perceptive to everything around her. Her love of life and all God has created motivates her to seek divine knowledge, become a more secure individual and protect her world and natural boundaries. She uses nature and all its wonderful resources to appeal to the senses,

inspire love and evoke the ecstasy that awaits her. The discerning gentleman finds her to be the ultimate lover and companion: sensual, mysterious, irresistible and true. She enjoys seduction and experiencing pleasure. A mystical seductress does not set out to seduce the opposite sex for seduction's sake, however. She is much more than a temptress. The goal of mystical seduction is to connect with the male species on a pure, spiritual level and revel in the beauty found only in sacred love. Each experience with a man, be he friend, lover or soul-mate, produces positive growth, helping the seductress find her higher self and thus, inner peace and happiness.

The Mystical Seductress is not a witch, nor is she devoted to practicing sorcery or witchcraft. She is simply a child of the Creator with a strong reverence for the universe and all its incredible manifestations. She is motivated by love. She strives for greater understanding of the universe so that she can abide by its laws and reap the blessings of her labor. The aim of The Mystical Seductress™ Handbook is to offer you illuminating secrets of enticement, ancient tools that will lift you spiritually and give you the power to enrapture the male of your choice. While men always respond to open enticement, the lasting impression you make will be based on something other than sex appeal. If you want a man to view you as more than a sexual object, you must appeal to something other than his male organ. This is where the tools of seduction come in.

There are also personal pages for your use, receptive spaces to organize your seductive thoughts and prepare for the mysteries ahead. In this way, your book becomes personalized. Everything in the following pages is here for your ultimate contentment. You are a gorgeous, vibrant woman and this unique book celebrates YOU! While the glossary contains a number of specialized terms used in mysticism, The Mystical Seductress™ Handbook is neither a study nor endorsement of the occult, nor does it involve the worship of any deities. This book is simply an information source that can help you to understand your world better, learn a little about what others believe and explore the many wonders of your life—tangible and metaphysical. The divine plan for you is one of freedom. Your mind, body and spirit are the keys which can unlock the universe— they are your most powerful possessions. You are free to move in any direction you choose. If you remain positive, if you strive to keep negative forces at bay, if you devote yourself to learning and growth, all the things you desire in life can be yours—because you've applied yourself and believed. Be mystical and be seductive. Above all, be happy!

**Important Note:** This book is neither a study of the occult, nor does it involve the worship of any deities.

*Tannis Blackman is a world traveler, scholar and truth-seeker. Her interesting the development of the Self has prompted studies in world religion, ancient philosophy and metaphysics. She is also a health and fitness enthusiast, and a certified dance instructor. She is currently developing a trademarked form of dance exercise to be introduced in the near future. Her future plans include travel to Egypt and Nubia, where she intends to research Tarot divination. She lives in New York City, promoting peace, love and universal understanding.*
